January 6, 1947 - April 30, 2023

The Power of Medicine, the Light of Fraternity.

-- Dedicated to Pan Huiwei, Because you like to write poems, for example, "the Song of Cornell", so I dedicate a poem to you.

by Wanghe Lou, Ph.D. Cornell University, USA
Master, University of Science & Tech. of China.

You come from here,
The pearl on the shore of Tai Lake,
The capital of ceramic- Yixing.
You come from here,
Xuanwu Lake next to No. 13 Middle School,
The blue waves are rippling, and a warm wind blows head-on.
The thick phoenix trees in the Zhongshan Mausoleum protect you.
You come from here,
Nanjing University has a beautiful campus and a solid physics building.

Xiaoyaojin lake left behind our youthful footsteps,
Dashu Mountain spent our days and nights.
As a representative of the Electronics Bureau of Anhui Province,
Participated in the planning of the national semiconductor development;

As a young scientist,
Following Master Lin Lanying, Xie Xide and Wang Shouwu,
Joined the planning of future Silicon Lake in Wuxi.

In the tide of reform and opening up,
We didn't stop and bravely stepped out of the country.
Overlooking the Finger Lakes,
The lofty bell tower of Cornell University,
Welcome.

There are deep canyons and a mighty waterfall,
With huge gymnasiums and stadiums on the campus.
There are steps of famed professors: Hu Shi, Mao Yisheng, and Li Pei.
Over there Professor Smack bred the famous Empire apple.
How many steps have you left behind in the vast apple orchard?
In the Post-harvest Physiology Laboratory he founded,
You often visited him after his retirement.
For 6 years, you provided a lot of experimental data,
Greatly prolonging the fresh-keeping time of apples.
It was highly appreciated by your supervisor.

North America is so big,
From Niagara Falls to Vancouver,
From San Diego to Florida,
From Yellowstone to Las Vegas,
Visiting or attending the meeting,
And see the world at a glance.

How many European countries have we seen?
Modern civilization started from there.
The Iron Bridge in London and the Eiffel Tower in Paris,
The Roman Colosseum and Dutch ancient windmill,

Mozart's hometown with the Vienna movement,
The prosperity of the Danube,
The elegance of the Rhine.
Now set foot on this fertile land
And visit the hometown of Science and Democracy.

The world is so big,
How much I wanted to travel all over the world!
On the morning of June 18, 2016, Calling my name,
You suddenly lost consciousness.
Don't you just leave us like this?
How many doctors and nurses worked on you, during 42 days in the ICU,
With us by your side day and night,
Modern medicine has created miracles,
You are back to this world.
More than a month of rehabilitation,
You have returned to our warm home.

The life begins again, We start a new exploration,
Rejuvenate the weak body.
Although there is still some pain,
You face it calmly and live with a smile.
Jasmine 19 is full of laughter and singing again.
For seven years, your blood pressure has remained normal,
In the past two years, there were none-stop dialysis.
Modern medicine, your optimism and perseverance, prolong your life.

After all, medicine has limitations.
The boundless life has to end.
901 Martha - Hotel-style ward,

Beautiful nurses and doctors took care of you,
No matter of your condition,
No complaints, while humming ditty with smiles.
Perhaps they serve God,
Perhaps it is human nature and fraternity.
Your body is spotless and free from pain.
Singing in sleep, "Let's row the oars,"
You dreamed back to your middle school days,
Rowing on Xuanwu Lake, Nanjing, China.

A plane whistling overhead about to land,
Landing means taking off again.
The red sunset slowly falls from the window,
Tomorrow it will gradually rise again.
The morning sun shines on your face through the window.
You smiled, then stopped breathing and heart beating.
The clock showed 7:19, Sunday, April 30 2023.
The holy light is the calling from god,
You flew to heaven.
Finished the last journey in this world;
You started a new journey to a new world.
Good people go all the way,
God bless!
